

Communications in Computer and Information Science

2323

Series Editors

Gang Li , *School of Information Technology, Deakin University, Burwood, VIC, Australia*

Joaquim Filipe , *Polytechnic Institute of Setúbal, Setúbal, Portugal*

Zhiwei Xu, *Chinese Academy of Sciences, Beijing, China*

Rationale

The CCIS series is devoted to the publication of proceedings of computer science conferences. Its aim is to efficiently disseminate original research results in informatics in printed and electronic form. While the focus is on publication of peer-reviewed full papers presenting mature work, inclusion of reviewed short papers reporting on work in progress is welcome, too. Besides globally relevant meetings with internationally representative program committees guaranteeing a strict peer-reviewing and paper selection process, conferences run by societies or of high regional or national relevance are also considered for publication.

Topics

The topical scope of CCIS spans the entire spectrum of informatics ranging from foundational topics in the theory of computing to information and communications science and technology and a broad variety of interdisciplinary application fields.

Information for Volume Editors and Authors

Publication in CCIS is free of charge. No royalties are paid, however, we offer registered conference participants temporary free access to the online version of the conference proceedings on SpringerLink (<http://link.springer.com>) by means of an http referrer from the conference website and/or a number of complimentary printed copies, as specified in the official acceptance email of the event.

CCIS proceedings can be published in time for distribution at conferences or as post-proceedings, and delivered in the form of printed books and/or electronically as USBs and/or e-content licenses for accessing proceedings at SpringerLink. Furthermore, CCIS proceedings are included in the CCIS electronic book series hosted in the SpringerLink digital library at <http://link.springer.com/bookseries/7899>. Conferences publishing in CCIS are allowed to use Online Conference Service (OCS) for managing the whole proceedings lifecycle (from submission and reviewing to preparing for publication) free of charge.

Publication process

The language of publication is exclusively English. Authors publishing in CCIS have to sign the Springer CCIS copyright transfer form, however, they are free to use their material published in CCIS for substantially changed, more elaborate subsequent publications elsewhere. For the preparation of the camera-ready papers/files, authors have to strictly adhere to the Springer CCIS Authors' Instructions and are strongly encouraged to use the CCIS LaTeX style files or templates.

Abstracting/Indexing

CCIS is abstracted/indexed in DBLP, Google Scholar, EI-Compendex, Mathematical Reviews, SCImago, Scopus. CCIS volumes are also submitted for the inclusion in ISI Proceedings.

How to start

To start the evaluation of your proposal for inclusion in the CCIS series, please send an e-mail to ccis@springer.com

Preface

Welcome to the 2024 International Conference on Pattern Analysis and Machine Intelligence (ICPAMI 2024). ICPAMI 2024 was an international conference organized by Shanghai Jiao Tong University and co-organized by Zhejiang University of Technology. It was held successfully in the modern city of Shanghai, China, from August 30th to September 1st, 2024. This conference was an excellent event where researchers and engineers from academia and industry met and shared their recent findings for the advancement of the field of Pattern Analysis and Machine Intelligence.

We were very honored to have four featured speakers for ICPAMI 2024. The keynote speakers were: Jie Yang from Shanghai Jiao Tong University, Ping Tan from Hong Kong University of Science and Technology, Dong Liang from Shenzhen Institute of Advanced Technology, Chinese Academy of Sciences, and Chen Gong from Nanjing University of Science and Technology. They highlighted the integration of AI technologies in enhancing diagnostic capabilities, improving imaging techniques, and advancing robotics.

To sum up, ICPAMI 2024 received 56 paper submissions. After a rigorous double blind review process, 28 papers were accepted for inclusion in this volume. These papers are divided into 3 sections in accordance with their common research interests: Computer Vision and Pattern Recognition, Natural Language Processing (NLP) and Machine Learning, Intelligent Systems and Optimization Algorithms.

We would like to express our sincere gratitude to all the members of the Technical Program Committee for their contribution to review and recommend high-quality papers. Our gratitude also goes to the Organizing Committee Members, who strongly contributed to make this event successful.

Finally, we hope that you had a great time at the conference, and a pleasant conference experience. Thank you for your valuable participation.
